SUMMARY

Applied Mathematics graduate from IIT Roorkee with hands-on experience building data pipelines, analytics platforms, and growth experimentation frameworks. Seeking Data Engineering / Analytics roles focused on scalable data systems.

KEY SKILLS

Programming: Python, SQL, Bash

Tools: Excel, Spark, Airflow, dbt, GCP (BigQuery, GCS), AWS (S3, Redshift), Docker, Git, GitHub, LaTeX, Tableau

EXPERIENCE

AI Product Engineer, Independent

2025 – Present

- Designed and implemented a **multi-source data pipeline** integrating content generation, metadata (keywords, engagement signals), and distribution across 6+ platforms (Webnovel, Webtoon, Pinterest, Reddit, Instagram, YouTube), supporting **100K+ total interactions**.
- Built a **multi-model AI orchestration workflow** leveraging Claude, ChatGPT, and Gemini for content generation and transformation, producing **chapters and visual assets** with improved consistency and reduced manual effort.
- Engineered a **Retrieval-Augmented Generation (RAG) system** using Ollama (Phi-3), embeddings, and ChromaDB, enabling semantic retrieval across **45K+ words of content** for consistent world-building.
- Structured and maintained **semi-structured datasets** (content metadata, engagement metrics, keyword performance).
- Optimized workflows for **scalability and modularity**, enabling parallel content generation and multi-platform deployment with reduced turnaround time.

Data Tech Intern, Kotak Mahindra Bank Ltd

May 2023 – Jul 2023

- Improved document parsing performance **5–10x** by benchmarking and optimizing Python parsing libraries.
- Built ingestion pipelines moving data from AWS S3 to Redshift.
- Converted unstructured documents into structured datasets enabling downstream analytics.

Research Associate, IIT Roorkee

Jun 2022 – Aug 2022

- Developed a novel inventory optimization framework using fractional calculus to model **memory effects**.
- Presented methodologies and insights at the **USTM-AIMT Summer International Conference 2022**.
- Co-authored *"Effects of memory on inventory control and pricing policy for imperfect production with rework process"* in **RAIRO-Operations Research** (published Jan 2025); achieved **8 citations** within 12 months of publication.

EDUCATION

Indian Institute of Technology Roorkee

Aug 2019 – Jun 2024

BS + MS in Applied Mathematics

CGPA: 9.1/10

Relevant Coursework: Data Mining for Business Intelligence, Numerical Optimization, Statistical Modeling, Data Structures and Algorithms, Database Management Systems, Statistical inference, Parallel Computing, Soft Computing.
